

## DOUBLE FLARED CRISS-CROSS COIL LOOP INSERTS

Second coil loop adds significant capacity in both shear and tension.

| PART NO.             | THREAD (D) | INSERT LENGTH (L) | BODY LENGTH (B) | WIRE DIA. (C) | LOOP SPREAD (S) | SWL (LBS) |
|----------------------|------------|-------------------|-----------------|---------------|-----------------|-----------|
| C33B 10x12-1/2" S    | 1"         | 12-1/2"           | 2-1/16"         | 0.375"        | 5-9/16"         | 9500      |
| C33B 10 x 12-1/2" HD | 1"         | 12-1/2"           | 2-1/6"          | 0.440"        | 5-3/4"          | 13500     |

Note: SWL provides a factor of safety of approximately 4:1 in 3,000 psi normal weight concrete.
